EDUCATION

SRM Institute of Science & Technology, Ktr, Chennai
BTech in Artificial Intelligence

Aug 2023 – May 2027
CGPA: 8.5/10

EXPERIENCE

AI Intern

June 2025 – July 2025

Growth System ERP Expert

- Worked with clients to build ERP software that uses AI agents to automate their day-to-day business tasks, using tools like **LangChain, LangGraph, and RAG**.
- Connected the system to client databases using **SQL** and set up a knowledge retrieval pipeline so the AI could answer questions from real business data.
- Talked to clients across 4+ teams to understand their needs, tested the product regularly, and kept improving it based on their feedback.

PROJECTS

AI-Driven ERP Workflow Optimization 🔄 | LLMs, RAG, LangChain, LangGraph

June 2025 – July 2025

- Built autonomous AI agents for ERP systems using **LangChain** and **LangGraph**, leveraging RAG pipelines and LLMs to automate complex business workflows end-to-end.
- Mapped 8 ERP pain points into a clear **product roadmap** and connected SQL knowledge stores to cut operational overhead by ~40%.
- Tested and improved the product through regular **user feedback** across 4+ client teams, with 80+ people using it daily.

HealthHive – AI Healthcare Management Platform 🔄 | Product Discovery, ML/NLP

September 2024

- Built an AI-powered healthcare platform handling medical **report analysis** and appointment scheduling — awarded **Top 10 Best Project** at HackSummit 2024.
- Designed features across clinical and user-facing modules, keeping the product simple, scalable, and aligned with real user needs.

FinGreen – NLP-Based ESG Product Analytics 🔄 | NLP, LLMs, OCR, ML, ESG Analytics

Ongoing

- Built and deployed an ESG analytics platform using **LLMs, NLP, and OCR** to automate emissions data extraction from financial documents for analysts.
- Trained a custom **ML model** to calculate carbon footprints, reducing manual reporting effort by **50%** and aligning outputs with global sustainability standards.

TECHNICAL & PRODUCT SKILLS

Product Management	Roadmap Planning, User Research, Requirement Gathering, Hypothesis Testing, Competitor Analysis, Agile & Sprint Planning, Prioritisation Frameworks (MoSCoW, RICE), Data-Driven Decision Making
AI & Engineering	Python, SQL, LLMs, LangChain, LangGraph, RAG, Prompt Engineering, OCR, REST APIs
Design & Analytics	Figma, Wireframing, Advanced Excel
Tools	GitHub, Docker, Postgres, MySQL, Jira
Soft Skills	Client Communication, Stakeholder Management, Cross-functional Collaboration, Strategic Communication, Negotiation & Conflict Resolution, Problem Solving
Public Speaking	20+ Model United Nations (MUNs) participated, multiple award winner; confident speaker and experienced in client-facing communication

COURSES & CERTIFICATIONS

ISRO – Geospatial Data & Geotagging 📍

February 2026

- Completed ISRO's certification on **geospatial data processing** and geotagging techniques for real-world mapping applications.

Oracle Autonomous Database Cloud 2025 Certified Professional 📍

October 2025

- Certified in scaling **cloud data infrastructure** and using GenAI for natural language querying across enterprise environments.

Intel – Python for Data Science and AI Development

August 2025

- Completed Intel's course on Python programming for data science and AI, covering libraries like NumPy, Pandas, and Scikit-learn for building and deploying ML models.
